PROFESSIONAL EXPERIENCE

MERN Stack Developer
present
Wallicon (P) Ltd ⧉
Lucknow, India

- Worked in a product-based organization creating proprietary products with a focus on modern web technologies.
- Developed and optimized the admin side interface using React.js.
- Built user-friendly dealer-side features using Next.js 14 for enhanced performance and scalability.
- Ensured responsive design and seamless user interactions across all front-end components.

SKILLS

- React Js
- Redux-toolkit
- Next js
- JavaScript
- Firebase
- Tailwind
- Git ,github
- REST APIs
- Node Js
- Express js
- MongoDB
- Html
- CSS

PROJECTS

Admin Panel ⧉

- **Admin Authentication with Role-Based and Device-Based Access Control** : Developed a secure authentication system for the admin panel (frontend and backend) supporting multiple roles like Order Manager, Dispatch Manager, Super Admin, Content Manager, and Inventory Manager. Integrated **device-based access control**, where users must request access from a new device — access is granted only after admin verification, ensuring enhanced security and controlled system entry.
- **Order Management** : Developed functionality to create, manage, and track customer orders within the admin system.
- **Receipt Generation** : Automated the creation of digital receipts for completed orders, improving transparency and record-keeping.
- **Dispatch System :** Built a robust module to handle product dispatches, shipment tracking, and delivery status updates.
- **Product Management :** Implemented features for adding, editing, and managing product listings.
- **Facebook API Integration** : Integrated Meta APIs to send pre-approved message templates and notifications to users.
- **Dealer Management** : Handled dealer data and activities sourced from **dealer.wallicon.in** ⧉ , including onboarding and account updates.

Dealer Wallicon ⧉

- Developed an e-commerce website featuring a dealer dashboard.
- Enabled dealers to place orders.
- Provided functionality for dealers to create sub-admins under their account
- Integrated a chat feature allowing dealers to communicate with the main admin and delivery partners directly from the website.

Wallicon ⧉

- Designed and developed the official **e-commerce platform Wallicon.in** ⧉ , enabling seamless product browsing and purchasing.
- Implemented a **secure payment gateway (SecurePay)** supporting multiple payment methods for smooth checkout.
- Built a **scalable backend** with APIs to manage product catalog, orders, dealer activities, and customer data.
- Integrated **real-time notifications and order tracking** for customers and dealers.
- Optimized website for **performance, SEO, and mobile responsiveness**, ensuring a better user experience.

Ruut App
Ecommerce App (ONDC Protocol)

- Spearheaded the development of Ruut, a multifaceted application providing a comprehensive suite of services within the ONDC platform.
- Developing the backend architecture of Ruut, building it from the ground up to ensure robust and scalable performance.
- Played a key role in crafting the Admin Panel, contributing to both the backend and frontend development to create a cohesive and user-friendly interface.
